

# Lutratur Art Journal Pages

## Skill Level: Intermediate

Designed By  
Mary Silvia

Part 2 in the Lutratur Art Journal Series. Mary Silvia demonstrates techniques that can be applied onto Lutratur<sup>®</sup>, a cross between paper and fabric. Add these pages to your Lutratur<sup>®</sup> Art Journal.

### Materials Needed

- One 8" x 10" piece Black 100 gm Lutratur<sup>®</sup>
- Two 8" x 10" piece White 100 gm Lutratur<sup>®</sup>
- 805 Wonder-Under<sup>®</sup> scraps
- Paintsticks
- Tee Juice Pens
- Glitter
- Watercolor paints
- Jacquard Silk Colors
- Metallic Paints
- Beads
- Foil

### Tools Needed

- Stencils of your choice
- Rubbing Plates
- Stamps
- Heat gun

## Art Journal Design Idea 1

**Step 1:** Cut a piece of 100gm black Lutradur® to approximately 8.5"x 10". Place piece over rubbing plate.

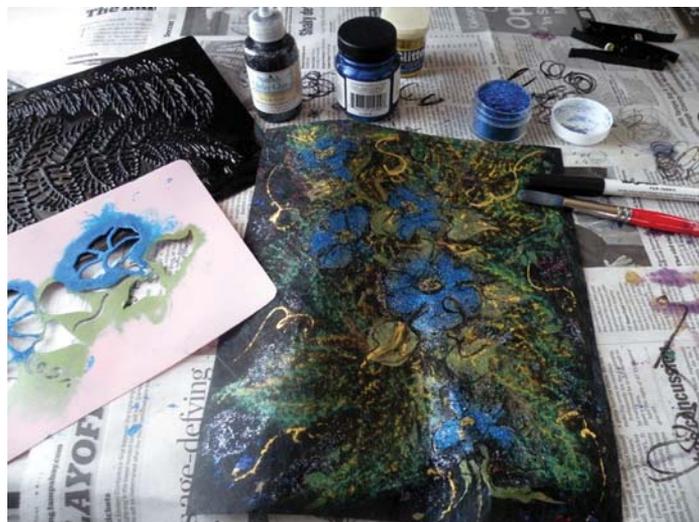

**Step 2:** Using Shiva paintstick, rub a fern design to create the background. Enhance this background with Lumiere metallic paints of greens and gold.

**Step 3:** When satisfied with your background art work, place the stencil over the background. Paint flowers and leaves using Lumiere and your artist brush.

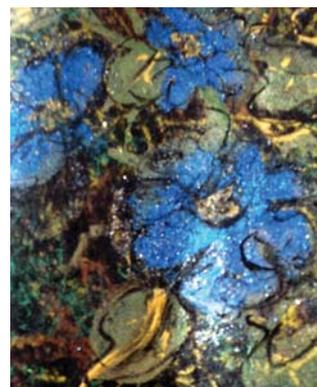

**Step 4:** While still wet, add blue glitter on flower petal. Use gold and green glitter over the leaves. For the middle of each flower add gold glitter. Sprinkle some glitter over the background.

**Step 5:** For extra detail, take your black Tee Juice pen and do line work around the flowers. Use a gold Scripto pen to add the swirly lines onto the art work and for the leaf lines. Splatter the edges with your brush in blues, reds and gold.

**Step 6:** Use the heat gun to lace the edges of your art work piece. Holes on the left side can be made by using a hole punch or soldering gun. Place finished page into your Art Journal.

## Art Journal Design Idea 2

**Step 1:** Step 1: Cut an 8" x 10" piece of 100 gm white Lutradur®. Using a foam brush, coat the paper from left to right with the Digital Grounds.

Let dry and then apply the liquid from top to bottom on the same piece.

**Step 2:** After the fabric dries, take a piece of letter size paper and using the blue painter's tape - tape the feeder edge across and down one side to hold the Lutradur in place for your printer. Place in the manual feeder and print. Allow to dry completely.

**Step 3:** Cut a piece of 100gm Lutradur 8.5" x 10". Use a heat gun to 'lace' the art work layer edges. Use the heat gun and lace the edges of the white background layer. Then using a soldering gun, put 'creative holes' into the art work layer.

**Step 4:** Take a piece of gold foil to fit an area under the art work. Fuse the foil onto the back of the art work piece using Wonder-Under®

**Step 5:** Add beads on the flowers by gluing in place or if you have hot fix applicator and stone, use that to add the embellishments. Use Pellon's Wonder-Under® to fuse the completed art work onto the cut piece of white and laced Lutradur background.

**Step 6:** A hole punch or solder gun will make the holes in the left side to add to your Art Journal

### Art Journal Design Idea 3

**Step 1:** Cut 8 x 10" piece of white Lutradur® for background. Wash with watercolors to create background.

Step 1

Step 2

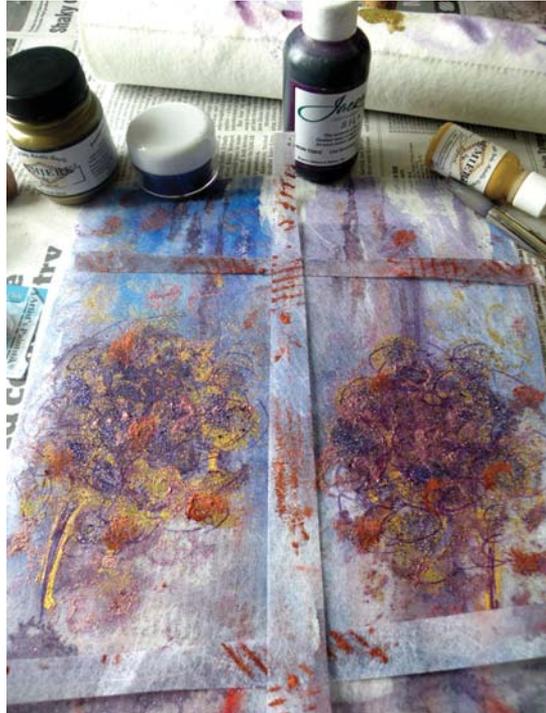

**Step 2:** Using Shiva paintstick, rub a fern design. Make artwork design of trees with metallic paints.

**Step 3:** Heat edges to create decorative edges and use organza to create a bow.

**Step 4:** Fused strips onto the Lutradur® and lacing on edges.
